Best	39.44%	39.44%

## **Fund overview**

The Fund provides investors with a diversified exposure across a range of sectors including utilities, real estate, telecommunication and healthcare to 20 of the largest companies listed in New Zealand. Large and liquid, many of these companies export globally and collectively account for over 80% of the value of the entire investable NZ stockmarket.

#### **Benefits**

The NZ 20 fund can be used in a variety of investment strategies, for example:

- A core allocation to NZ equities
- A tactical exposure to NZ blue-chips
- A low cost alternative to other active managers

Kernel does not accept any responsibility for any error or omission or for any loss resulting from the use of this information, except to the extent required by law.

- 1- 12 month Yield is calculated as the last 4 quarterly distributions divided by unit price 12 months ago. This is the experience an existing investor would be had.
- 2. Indicative Dividend is the index calculation of the underlying dividends in the last 12 months divided by the current valuation
- <sup>3.</sup> Management fee before rebates.
- 4. 12month volatility is the standard deviation of index daily returns, annualised by multiplying by square root of number of periods.
- 5. Performance assumes distributions reinvested. Net index difference is after management fees and transaction costs
- <sup>6.</sup> Growth of a hypothetical investment in the index (no allowance for fees or taxes) and no further contributions.
- 7. Global Industry Classification Standard (GICS)
